

INDEX

Metals Engineering Quarterly

Volume 2, 1962

Index of Authors

(The first number cited is the issue number, the second is the page.)

A	
Ananthanarayanan, N. I.	4-43
B	
Barratta, F.	3-9
Bradbury, III, Samuel	2-61
Bunk, A. P.	4-27
C	
Campbell, Hallock C.	2-25
Campbell, J. E.	4-48
Clark, C. L.	3-28
Clark, D.	3-9
G	
Gales, D. W.	3-17
Geisack, Leo E.	1-16
Goldsmith, Henry A.	1-62
Graf, Jr., George L.	1-36
H	
Hanks, G. S.	2-52
Hahn, Richard C.	1-62
Hill, David H.	3-22
Hollander, Milton B.	2-14
Hopkin, III, G. S.	3-38
Hughel, Thomas J.	2-42
I	
Itika, G. A.	2-30
J	
Japka, J. E.	3-38
K	
Kirby, R. S.	2-52
Koebel, Norbert K.	1-21
L	
LaQue, F. L.	2-35
Levinson, David W.	4-21

M	
MacMillan, Donald P.	3-5
McClintock, R. M.	1-28
McClung, R. W.	2-68
Mash, Donald R.	4-1
Matthews, Paul E.	2-61
Moran, J. J.	2-35
Murphy, D. J.	2-52
P	
Pascoe, W. R.	3-35
Peavler, R. J.	4-43
Perry, Ross W.	1-56
Pollock, Warren I.	4-58
R	
Raudebaugh, R. J.	1-41
Reynolds, Harry L.	3-1
Russell, J. V.	1-49
S	
Scala, E.	4-69
Schiff, Daniel	4-32
Sherby, Oleg D.	2-3
Simmons, W. F.	4-48
Skinner, E. N.	2-35
Spalding, L. P.	4-14
T	
Taub, J. M.	2-52
Todd, H.	3-9
U	
Ulbrich, Carl H.	1-21
W	
Weisert, E. D.	1-3
Wilburn, D. K.	4-9
Wittry, David B.	3-47
Wooding, Walter H.	2-25
Worlock, R.	3-9

Subject Index

A	
Aerospace Materials Requirements	1-16
Age hardening	
Recent Developments in Columbium	
Physical Metallurgy	4-58
Adhesive joining	
The Properties and Testing of High-Strength	
Adhesives	2-30
Advanced Re-entry Materials	4-69
Aircraft structures	
Beryllium—A Space-Age Metal	2-42
Precipitation-Hardening Stainless Steels in	
Supersonic Aircraft	4-14
Vacuum Brazing of Aircraft Alloys	1-21
Alloy steels	
Metals Under Extreme Conditions of	
Temperature and Stress	3-28
Alloys, high-temperature	
Vacuum Brazing of Aircraft Alloys	1-21
Aluminum alloys	
Materials for Fabrication of Large	
Volume Cryogenic Tanks	4-27
B	
Beryllium	
Beryllium—A Space-Age Metal	2-42
Materials for Nuclear Ramjets	3-1
Beryllium—A Space-Age Metal	2-42
Boron nitride	
Pyrolytic Materials for Re-entry Applications...	4-32
Brazing	
Precipitation-Hardening Stainless Steels in	
Supersonic Aircraft	4-14
Vacuum Brazing of Aircraft Alloys	1-21

C	
Capabilities of Electroslag Welding	2-25
Ceramics	
Fiber-Reinforced Structural Materials	4-21
Materials for Nuclear Rockets	3-5
Cesium	
Material for Ion Propulsion	3-9
Chemical processing equipment	
Metals Under Extreme Conditions of	
Temperature and Stress	3-28
Cladding	
Fusion Bonding Plastics and Metals	3-35
Cleaning, ultrasonic	
A New Way to Measure Ultrasonic	
Cavitation Intensity	1-62
Coating	
Plasma-Arc Spraying of Space-Age Materials...	4-1
Coating, diffusion	
Effect of Chromizing Treatments on Properties of	
Metal Powder Parts	2-61
Cold heading	
Steels for Cold Forming	1-49
Columbium	
Materials for Nuclear Ramjets	3-1
Columbium alloys	
Recent Developments in Columbium Physical	
Metallurgy	4-58
The Present Status of Refractory	
Metals and Alloys	1-3
Comparative Costs of Plastics Moldings and	
Metal Die Castings	1-36
Corrosion resistance	
Materials for Anti-Smog Devices	2-35

Cryogenic applications	
Materials for Fabrication of Large Volume	
Cryogenic Tanks	4-27
Cryogenic Testing of Structural Solids	1-28
D	
Density, powder metals	
Elevated-Temperature Impact Densification of	
Mo- UO_2 Powder Mixtures	2-52
Developments in Friction Welding	2-14
Die castings	
Comparative Costs of Plastics Moldings and	
Metal Die Castings	1-36
Drawing	
Lubrication for Cold Forming	1-56
Ductility	
Limitations in Forming and Shaping	2-3
E	
Effect of Chromizing Treatments on Properties of	
Metal Powder Parts	2-61
Electrical Discharge Machining	3-22
Electron probe	
Micrometallurgy	3-47
Elevated Temperature Impact Densification of	
Mo- UO_2 Powder Mixtures	2-52
Extrusion	
Lubrication for Cold Forming	1-56
Steels for Cold Forming	1-49
F	
Fiber-Reinforced Structural Materials	4-21
Flaw detection	
Techniques for Low-Voltage Radiography	2-68
Forming	
Limitations in Forming and Shaping	2-3
Shear Forming of Tungsten	3-38
Fusion Bonding Plastics and Metals	3-35
G	
Glass-fibers	
Fiber-Reinforced Structural Materials	4-21
Graphite	
Materials for Plasma Propulsion	3-17
Pyrolytic Materials for Re-entry Applications	4-32
I	
Inspection	
Techniques for Low-Voltage Radiography	2-68
Thermographic Profiles of Material	
Discontinuities	4-9
Iron	
Pre-alloyed Fe-Ni Powders	4-43
L	
Limitations in Forming and Shaping	2-3
Low expansion alloys	
Structural Property Relationships in 30 to 80%	
Nickel-Iron Alloys	1-41
Low-temperature properties	
Cryogenic Testing of Structural Solids	1-28
Lubrication for Cold Forming	1-56
M	
Materials for Anti-Smog Devices	2-35
Materials for Fabrication of Large Volume	
Cryogenic Tanks	4-27
Materials for Ion Propulsion	3-9
Materials for Nuclear Ramjets	3-1
Materials for Nuclear Rockets	3-5
Materials for Plasma Propulsion	3-17
Magnetically soft alloys	
Structural Property Relationships in 30 to 80%	
Nickel-Iron Alloys	1-41
Mechanical Tests for Metals Evaluation	4-48
Metal powder, structural parts	
Effect of Chromizing Treatments on	
Properties of Metal Powder Parts	2-61
Metal spraying	
Plasma-Arc Spraying of Space-Age Materials	4-1
Metals Under Extreme Conditions of	
Temperature and Stress	3-28

Micrometallurgy	3-47
Molybdenum	
Materials for Nuclear Ramjets	3-1
Molybdenum alloys	
Elevated-Temperature Impact Densification of	
Mo- UO_2 Powder Mixtures	2-52
The Present Status of Refractory	
Metals and Alloys	1-3
N	
New Way to Measure Ultrasonic Cavitation	
Intensity	1-62
Nickel	
Pre-alloyed Fe-Ni Powders	4-43
Nickel-iron alloys	
Structural Property Relationships in 30 to 80%	
Nickel-Iron Alloys	1-41
Nuclear reactor components	
Materials for Nuclear Ramjets	3-1
Materials for Nuclear Rockets	3-5
Nuclear reactor fuel elements	
Elevated-Temperature Impact Densification of	
Mo- UO_2 Powder Mixtures	2-52
P	
Petroleum processing equipment	
Metals Under Extreme Conditions of	
Temperature and Stress	3-28
Plasma-Arc Spraying of Space-Age Materials	4-1
Plastic deformation	
Limitations in Forming and Shaping	2-3
Plastics	
Fiber-Reinforced Structural Materials	4-21
Polymers, thermosetting	
Comparative Costs of Plastics Moldings and	
Metal Die Castings	1-36
Fusion Bonding Plastics and Metals	3-35
Powder metals, production	
Pre-alloyed Fe-Ni Powders	4-43
Powder metals, properties	
Pre-alloyed Fe-Ni Powders	4-43
Powder metallurgy	
Elevated-Temperature Impact Densification of	
Mo- UO_2 Powder Mixtures	2-52
Pre-alloyed Fe-Ni Powders	4-43
Precipitation-Hardening Stainless Steels in	
Supersonic Aircraft	4-14
Present Status of Refractory Metals and Alloys	1-3
Pressure vessels	
Materials for Fabrication of Large Volume	
Cryogenic Tanks	4-27
Properties and Testing of High-Strength	
Adhesives	2-30
Pyrolytic Materials for Re-entry Applications	4-32
R	
Radiography	
Techniques for Low-Voltage Radiography	2-68
Recent Developments in Columblum Physical	
Metallurgy	4-58
Refractory metals	
Aerospace Materials Requirements	1-16
Materials for Nuclear Rockets	3-5
Materials for Plasma Propulsion	3-17
Plasma-Arc Spraying of Space-Age Materials	4-1
The Present Status of Refractory Metals and	
Alloys	1-3
S	
Shear Forming of Tungsten	3-38
Space craft	
Aerospace Materials Requirements	1-16
Advanced Re-entry Materials	4-69
Materials for Ion Propulsion	3-9
Materials for Nuclear Ramjets	3-1
Materials for Nuclear Rockets	3-5
Materials for Plasma Propulsion	3-17
Pyrolytic Materials for Re-entry Applications	4-32
Spark machining	
Electrical Discharge Machining	3-22
Stainless steels	
Materials for Fabrication of Large Volume	
Cryogenic Tanks	4-27

Metals Under Extreme Conditions of Temperature and Stress	3-28
Precipitation-Hardening Stainless Steels in Supersonic Aircraft	4-14
Vacuum Brazing of Aircraft Alloys	1-21
Stamping	
Lubrication for Cold Forming	1-56
Steel, low alloy	
Materials for Fabrication of Large Volume Cryogenic Tanks	4-27
Steels for Cold Forming	1-49
Structural Property Relationships in 30 to 80% Iron-Nickel Alloys	1-41

T

Tantalum alloys	
The Present Status of Refractory Metals and Alloys	1-3
Test methods	
Mechanical Tests for Metals Evaluation	4-48
Advanced Re-entry Materials	4-69
Testing	
Cryogenic Testing of Structural Solids	1-28
Techniques for Low-Voltage Radiography	2-68
Thermal properties	
Advanced Re-entry Materials	4-69
Thermographic Profiles of Material Discontinuities	4-9

Thermographic Profiles of Material Discontinuities	4-9
Thermoplastics	
Comparative Costs of Plastics Moldings and Metal Die Castings	1-36
Tungsten	
Materials for Ion Propulsion	3-9
Shear Forming of Tungsten	3-38
Tungsten alloys	
The Present Status of Refractory Metals and Alloys	1-3

U

Uranium	
Materials for Nuclear Ramjets	3-1

V

Vacuum Brazing of Aircraft Alloys	1-21
---	------

W

Welding	
Capabilities of Electroslag Welding	2-25
Welding	
Developments in Friction Welding	2-14

X

X-ray spectrometry	
Micrometallurgy	3-47
